

Novo-Dry Desiccant Sheet

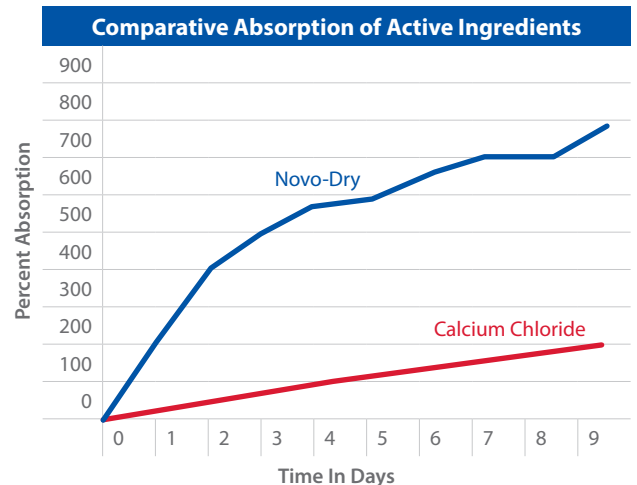

Novo-Dry Desiccant Sheet

DRY AIR ANYWHERE

Novo-Dry is a new, patented desiccant that delivers higher performance than current desiccants on the market today. Standard desiccants are made from grains or pellets encased in packets. Novo-Dry is efficiently dispersed on a molecular level into a paperboard form, which eliminates the costly process of insertion. Novo-Dry absorbs at least 2 times the humidity of silica gel. Therefore, less desiccant material is required and greater capacity is achieved.

PERFORMANCE FEATURES

- Made from recycled paper and may be recycled at curbside.
- Eliminates potential safety hazards, spills and mess caused when traditional silica gel or clay packs burst or are opened.
- Effective within a wide temperature range protecting perishable food and fresh produce by controlling relative humidity and providing insulation.
- Controls humidity to prevent rust, corrosion, and mildew on such products as metal parts, furniture, electronics, leather goods and apparel.
- Complies with FDA regulations for direct food contact packaging; 21CFR 176.170 (conditions of use B,C,D,E,F,G,H), 21CFR 176.180, 21CFR 176.260 pulp from reclaimed fiber, 21CFR 109.30a (9) pertaining to PCB content of paper food packaging materials.
